SECTION C34.401
Issue 1, 10-4-32
Standard

APPARATUS BLANKS

DESCRIPTION AND USE

1. GENERAL

1.01 This section lists and describes in table form the standard apparatus blanks used with station apparatus.

| Code No. | Finish | Description and Use |
|-----------------|--------------------------|---|
| 50-B | Black | A metal disc used to cover the dial hole in 553 and 653 type subscriber sets when used without a dial for manual service. |
| 50C-3 50C-13 | Black Oxidized Bronze | Metal frames used to mount an instruction card and cover the dial hole in 50 and 150 type coin collectors when used without a dial for manual service. Can also be used to mount instruction cards on walls. |
| 50-D | Black | A metal disc and weight used to cover the dial hole in 50 type desk stands and "A" type hand set mountings when these are used without a dial for manual service. |
| 50-E | Black | A metal disc and weight used to cover the dial hole in all 51, 52, 151 and 152 type desk stands when used without a dial for manual service. Furnished equipped with an insulating block having two screw terminals for connecting the leads that would otherwise be connected to the dial. |

| Code No. | Finish | Description and Use |
|--|---|---|
| 50H-3 50H-4 50H-5 50H-6 50H-7 50H-8 50H-11 50H-12 | Black Ivory Gray Old Brass Statuary Bronze Oxidized Silver Medium Gold Dark Gold | Metal discs used to cover the dial hole in "B" and "E" type hand set mountings when used without a dial for manual service. |
| 50J-3 50J-4 50J-5 50J-6 50J-7 50J-8 50J-11 50J-12 | Black Ivory Gray Old Brass Statuary Bronze Oxidized Silver Medium Gold Dark Gold | Metal discs used to cover the dial hole in "D" type hand set mountings when used without a dial for manual service. |
| 74-A | Oxidized Bronze | A rectangular metal plate with ventilating slots used in 5 and 6 type telephone booths when the booths are not equipped with 1-A light fixtures. It is furnished with mounting screws and a clamp plate. |
| 80-A | Dark Gray | A metal disc used to cover the dial hole in 300 type outdoor telephone sets when used without a dial for manual service. Furnished equipped with an insulating block having three screw terminals for connecting the leads that would otherwise be connected to the dial. |
