

## TELEPHONE SETS—1750 SERIES

### IDENTIFICATION, INSTALLATION AND ASSEMBLY OF PARTS

#### I. GENERAL

**1.01** This section supplements Section C38.680.00, Telephone Sets, 750 Series, Identification, Installation, and Assembly of Parts.

**1.02** This section contains information only on those components of the 1750 series telephone sets which differ from those of the 750 series.

**1.03** The 1750 series consists of four new telephone set codes: 1750A-58, 1750B-60, 1751C-58, and 1751D-60. The components of these

sets are similar to those used in the 750A, 750B, 751A, and 751B sets, respectively. The 1750 series also includes:

- 25A3 TOUCH-TONE dial.
- Rearrangement of components.
- New coded mats.

**1.04** The new components are shown in Table A. For all other information refer to Section C38.680.00.

**1.05** Photographs of these sets are not provided, as shop models were not available at time of printing.

**TABLE A**

**1750 SERIES COMPONENT PARTS WHICH DIFFER FROM 750 SERIES**

Set Codes	Dial	Ringer	Network	Switch Assembly	Mat
1750A-58	25A3	D1E*	4010B	P-85A161	P-26E932†
1750B-60				P-85A160	P-26E933‡
1751C-58				P-89A461	P-26E926†
1751D-60				P-89A461	P-26E927‡

\* Will also be used in future production of 750 series telephone sets.

† Aluminum colored mat.

‡ Copper colored mat.
