

INTERCOMMUNICATION SYSTEMS
WEBSTER ELECTRIC TELETALK
1200 SERIES (LOW-LEVEL)
CONNECTIONS

1. GENERAL

1.01 This section contains schematic and descriptive drawings covering the various equipment items used with the 1200 Series Webster Electric Teletalk Systems.

2. CONTENTS

2.01 The following is a list of schematics and drawings found in this section:

FIGURE	DESCRIPTION
1	Combination "M" & "S" system or all "M" system layout using call-in feature
2	Annunciator system layout
3	Typical "S" circuit system layout
4	Typical "M" & "S" circuit system or all "M" circuit system layout without call-in feature
5	Two station low-level system using RMB remotes
6	Speaker station connections - annunciator and silencing circuit layout
7	Speaker station arranged to provide call-in service
8	Speaker station for use in annunciator and silencing circuit system
9	All call paging with booster amplifier
10	All call paging with speakers not part of intercom system
11	Speaker stations 5G45, 5G45B, 5G45S and 5G45R
12	Speaker stations 5G45BS, 5G45RS and HS 45
