

**5ESS® SWITCHING SYSTEM  
FLOOR PLAN DATA**

**1. GENERAL DESCRIPTION**

**1.1 PURPOSE OF CIRCUIT**

The floor plan data drawing is provided as an aid to engineering 5ESS® switch office layouts. The drawing provides data on the physical attributes of 5ESS® switch cabinet designs. Weight, floor space requirements, limiting conductor information, cable build-up specifications, cabinet numbering schemes, and recommendations for placement within the office are provided on a cabinet basis.

Guidelines for the layout of 5ESS® switch offices are provided. Information regarding aisle numbering, aisle spacing, column spacing, and minimum clearance requirements is given.

Typical floor plans are provided for various 5ESS® switch office configurations.

**2. DETAILED DESCRIPTION**

The floor plan data drawing is a reference document.

**3. REFERENCE DATA**

None.

**4. REASONS FOR REISSUE**

*Description of Changes*

Provided a cabinet detail showing the new hole bolt-down pattern for the ED5D184-71 cabinet groups 1B-12B.

Added an additional cabinet dimension from the front of the cabinet to the center of the first hole bolt-down slot.
