JACK CIRCUIT
FOR ATTENDANT SWITCHBOARD POSITIONS

CHANGES

D. DESCRIPTION OF CIRCUIT CHANGES

- D.1 Fig. 9 is added for the 608A switchboard.
- D.2 CAD 10 is added.
- D.3 Note 102 is changed to add reference to Fig. 9.
- D.4 Note 107 is added.
- D.5 The designation "SUPV" is added to Fig. 8.

1. PURPOSE OF CIRCUIT

This circuit provides a means for wiring switchboard jacks and associated

lamps on a universal basis that may be applied to any circuit listed in Table A or B.

2. WORKING LIMITS

The working limits are the same as specified in the circuit drawing to which this circuit is applied.

3. FUNCTIONS

The circuit functions the same as specified by the particular circuit drawing to which this circuit is applied.

4. DESCRIPTION OF OPERATION

4.01 This circuit operates the same as the operation described in the circuit description of the particular circuit to which this circuit is applied.
