

**NO. 4A CROSSBAR**  
**ASSIGNMENT PRACTICES**  
**TRUNK BLOCK CONNECTORS**

**1. GENERAL**

**1.001** This addendum supplements Division H, Section 13c(5), dated July 1973.

**1.002** This addendum is issued to reflect the addition of common channel interoffice signaling (CCIS) to the No. 4 Switching System.

**2. CHANGES TO SECTION**

**2.001** All references to trunk block connector assignments will continue in effect for non-CCIS trunk groups and trunks.

**2.002** CCIS trunk groups and trunks do not require trunk block connector assignments for outgoing trunk selection, but will instead be selected by the electronic system. The input for this selection will be via ETS-8075 form code data. Instructions for form code completion are explained in the 4A-ETS Translation Guide.

**NOTICE**

Not for use or disclosure outside the  
Bell System except under written agreement
