

EMERGENCY OPERATION OF
K1 CARRIER TELEPHONE SYSTEMS

1. GENERAL

1.01 This Addendum to Section E44.060, Issue 1, dated September, 1942 cancels those parts of the section which deal with the operating instructions for restoring transmission on an emergency basis, retaining in the section for reference purposes the theoretical considerations. The operating instructions are included in Section E24.067.

1.02 In the revised operating instructions for single cable operation contained in Section E24.067, the deviation regulators in the direction of transmission receiving from the fault section are operated at fixed gain and

the use of the 56 kc pilot traps has been discontinued. Therefore, references to these pilot traps in Section E44.060 should be disregarded.

1.03 Cancel the following information:

4. PROCEDURES FOR RESTORING SERVICE WHEN A REPEATER STATION IS DISABLED.
Pages 14 to 22, Paragraphs 4.01 to 4.09.

5. PROCEDURES FOR RESTORING SERVICE WHEN ONE CABLE IN REPEATER SECTION IS DISABLED.
Pages 22 to 30, Paragraphs 5.01 to 5.14.
