

ALPHABETICAL INDEX

NOTES CONCERNING THIS ADDENDUM

This addendum supplements G00.100.1 and is being issued to replace the information contained in paragraph 1.01 and to provide additional information to make the section useful in this Area. It is being reissued to bring it up to date.

"See Addendum" should be marked in G00.100.1 to indicate the following:

Paragraph 1.01 - replaced
Part 2 - added

1. GENERAL

1.01 This section provides an alphabetical index of active A.T. & T. Company issued Bell System Practices, and is being issued to be used merely as a guide for locating information covered by the "G" series. Complete numerical "Checking Lists and Index" numbered G10.000.1 to G90.000.1 and printed on ORANGE paper for ready identification are provided for the construction and maintenance forces and G10.110.1, .2, .3 and .4 are for use of the installation and maintenance forces.

2. LOCAL INFORMATION

2.01 The following information is being provided to make this section useful in this Area:

(a) Where A.T.& T. Company sections have been re-written locally they carry an alphabetical issue number, for example, G10.301, Issue B. No difficulty should be experienced in locating these sections because they carry the same number and subject as the A.T.& T. Company issue.

(b) Local Sections which are issued to cover additional information to that included in A.T.& T. sections are given same number except for the sixth digit which is .0; also in a number of cases sections have been broken down and issued locally in related subsections, for example, G10.207.1 was issued locally as G10.207.1 to .7. In both the above instances the last digit will not agree, however, they will appear in the same sequence as to "Kind of plant", as covered by paragraph 1.02, and can be readily located.

(c) Locally prepared addenda to A.T.& T. Company sections are not listed in as much as they cover the same subject as the main section which should be cross-referenced "See Addendum."

2.02 The following A.T.&T. Company issued practices were not standardized for use in this Area and these listings should be deleted from the index:
