

GUARDING WORK AREAS

GENERAL

NOTES CONCERNING THIS ADDENDUM

This addendum is reissued to provide additional instructions on red kerosene lanterns and Highway Flashers in order to conform to local routines and regulations.

The following Paragraphs should be marked "See Addendum" and treated as indicated:

Paragraphs 2.04 and 2.15 - Supplemented

2. PRECAUTIONS

2.04 The standard Battery Carrying Strap shall be used on the storage batteries required for the operation of the Highway Flasher when loading and unloading or placing and removing the batteries in a Storage Battery Carrier. In using the Battery Carrying Strap, care should be taken to properly seat the metal lifting device on the battery terminals to prevent possible dropping of the battery.

2.15 Kerosene or open-flame type lanterns shall not be placed closer than ten feet to an open manhole.
