

GUARDING WORK AREAS
STANDARD WARNING DEVICES,
DESCRIPTION AND USE

NOTES CONCERNING THIS ADDENDUM

This addendum is issued to delete some warning devices that are not standard in this Area and to provide information on locally standardized warning devices and regulations.

The following Paragraph should be marked "See Addendum" and treated as indicated:

Paragraph 2.01 - At pages 2, 3, 9, 10, 17, and 18. Partially replaced and supplemented.

2. WARNING DEVICES

2.01 The illustrations in the main section for Warning Devices listed below should be marked to indicate deletions or changes as follows:

B Warning Sign. Due to a change in California State law regarding the size of warning signs, this sign is replaced by the Men and Equipment Working Sign, Drawing DM-0087. B Warning Signs in stock or in field use may continue to be used until present stock is depleted at which time the required 20 inch by 24 inch size sign will be supplied.

Demountable Warning Sign. Not standard for use in this Area.

B and C Warning Flashers. California State law prohibits the use of flashing red lights for other than emergency purposes. To conform to this law, these flashers will be supplied with yellow or amber lenses.

B and C Manhole Shields. In this Area, the C Manhole Shield has replaced the B Manhole Shield and will be supplied in yellow enamel finish only. The locally developed 24 inch Manhole Barricade, finished in yellow enamel, is also available for use in excluding surface water from 27 inch and 30 inch manhole openings. This cylindrical barricade is provided with a gasket for seating against the rim of the manhole and permanently attached, adjustable hooks for locking the barricade in position as well as for compressing the gasket to form a water-tight seal. Manhole Shields and the 24 inch Manhole Barricade are not primarily designed as warning devices and should be considered supplemental to all other warning devices necessary for adequate protection of the work area.

B Warning Flag Base. This item is not standard for use in this Area. It is replaced by the Warning Flagstaff Base, Drawing B-2538 which is an 8 inch square cast iron base for use in supporting the D or F Warning Flag in an upright position on the ground.
