

OPEN WIRE
DEAD-ENDING

NOTES CONCERNING THIS ADDENDUM

This addendum supplements Section G31.130.1 and is issued to cover method of dead-ending wire at a division of feed in exchange lines.

The cross-reference "See Addendum" should be written following Paragraph 1.02 in Section G31.130.1 to indicate additional information has been added.

1. GENERAL

1.03 Where a division of feed is involved in an open wire line, dead end the wires on TW insulators attached to wooden pins on the top of the crossarm. This arrangement will permit placing 101A terminals as required.
