

OPEN WIRE

NON-CATENARY LONG SPAN CONSTRUCTION

NOTES CONCERNING THIS ADDENDUM

This addendum supplements Section G31.170 and specifies the use of River Crossing Strand in place of 165 River Crossing Wire, the manufacture of which has been discontinued. It also includes the correction of a typographical error.

1. STANDARD NAMES OF SUPPLIES

In Section G31.170, in the list of materials, cancel the listing for "Wire, 165 Galvanized Steel River Crossing," and substitute the following:

STRAND: River Crossing Strand, (2 oz. or 0.7 oz.)  
Galvanizing.

NOTE: Wherever reference is made, in Section G31.170, to the use of 165 River Crossing Wire, substitute the new standard River Crossing Strand. The practices outlined therein are also satisfactory for use in placing the strand.

11. SIZES OF POLES FOR FIXTURES

11.02 Sizes of poles for dead end fixtures.

NOTE: In the two tables found on Page 17 and the table at the top of Page 18, correct typographical error as follows:

Change: "Ultimate Wire Load"

To Read: "Ultimate Crossarm Load"
