

OPEN WIRE
HIGHER VOLTAGE JOINT USE
99A PROTECTOR - GENERAL

This addendum supplements the instructions covering the 99A Protectors to include 118A Protectors.

"See Addendum" should be marked in G31.180.1 to indicate the following:

Paragraph 1.01 - Supplemented

1. GENERAL

1.01 The 99A Protector has been replaced by the 118A Protector for use on open wire lines in higher voltage joint use. The instructions in this Section and Section G31.180.2, covering the use, special instruction methods and grounding of 99A Protectors also applies to the 118A Protectors. Other features of the 118A Protectors are covered in Section G38.112.1 "118A PROTECTOR, OPEN WIRE HIGHER VOLTAGE JOINT USE."

Use 118A Protectors when new protectors are required on open wire in higher voltage joint use.
