MOUNTING SPECIAL EQUIPMENT

1. METHOD OF MOUNTING

1.01 If phantom repeating coils, or other special equipment, are to be mounted on a pole, they shall be placed in a B or BB cable terminal box of sufficient size to accommodate the number of coils specified.

1.02 The bridling from this box shall be done in accordance with the Bell System Practices covering Bridling.

1.03 Protector mountings will not be required unless specified on the detail plans.
