

## PROTECTOR BLOCKS

### GENERAL

#### NOTES CONCERNING THIS ADDENDUM

This addendum supplements Section G38.010.1 and is being issued to make information contained therein applicable to all N-type protected terminals and to make tool nomenclature correspond with ordering information listed in Catalogue of Supplies.

The cross-reference "See Addendum" shall be written in G38.010.1 to indicate the following:

- Paragraph 2.05 - Supplemented
- Paragraph 2.07 Note - Replaced
- Paragraph 5.01 - Supplemented

#### 2. TYPES OF PROTECTOR BLOCKS

2.05 The information covered in Paragraph 2.05 of the main section, relative to the line and ground electrodes of the protector, applies only to the protected type distribution cable terminals. When used in the 111 or 106 type protectors the shell of the 107 protector forms the line electrode.

2.07 Note: Precautions covered in Paragraph 3.01 apply to both types of protector blocks. The remainder of this section from Paragraph 4.01 on pertains to the rectangular blocks only.

#### 5. INSPECTION AND MAINTENANCE

5.01 The 3A Holder referred to is listed in the Catalogue of Supplies as, Case, Carrying, No. 3A.
