

MANHOLES
CONCRETE FORMS
GENERAL

NOTES CONCERNING THIS ADDENDUM

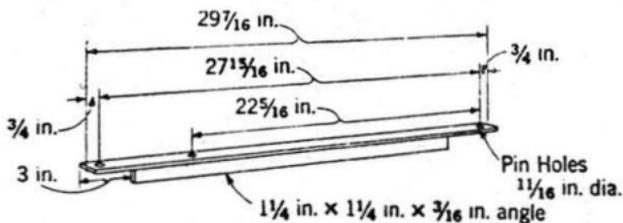

This addendum supplements Section G43.120.1 to provide a cross brace assembly piece part which complies with minimum manhole width requirements in the State of California.

The cross reference "See Addendum" should be written at Paragraph 2.07 (and the associated drawing) which is replaced herein.

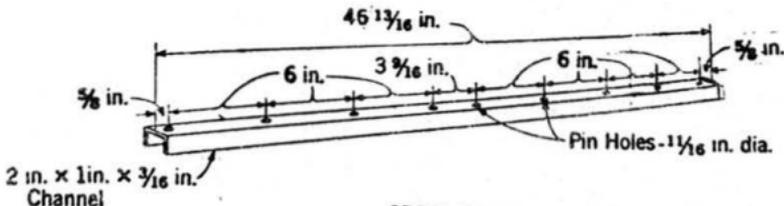

2. DETAILS OF MANHOLE FORM PARTS

Braces

2.07 In erection of the forms, two types of braces are used, a corner brace for squaring up the form assembly and a cross brace for stiffening the form. The cross brace illustrated below is of proper length for use with a form assembly 4 feet wide. For wider forms, two cross braces can be joined with short pins and wedges to make a single brace of the proper length.
