ADDENDUM G50.637.7  
Issue A, February, 1949-S

CABLE SPLICING - GENERAL  
TERMINATION OF B DISTRIBUTION CABLES  
IN BUILDINGS

NOTES CONCERNING THIS ADDENDUM

This addendum supplements Section G50.637.7 and provides for splicing B Distribution Cable to the stubs of building cable terminals.

The cross-reference "See Addendum" should be marked following paragraph 1.02 in Section G50.637.7, to indicate the addition of new information.

1. GENERAL

1.03 B Distribution Cable may be spliced to the stubs of protected or unprotected building cable terminals in the same manner as to other lead covered cables.

Note: Where the terminal stub is paper insulated, a gas pressure plug shall be made in the stub adjacent to the connecting splice.
