

CABLE SPLICING - GENERAL

WIRE TIES

NOTES CONCERNING THIS ADDENDUM

This Addendum supplements Section G50.688.3 and is being issued to provide for the use of a lead spacer between cables at Wire Ties.

The cross-reference "See Addendum" should be marked in Section G50.688.3 at Paragraph 2 to indicate the addition of new information.

2. METHOD OF LASHING

Note: A small lead spacer may be placed between the cables at the lashing point in order to provide a solid surface for the lead lashing wire tie. The spacer shall be made of lead only and may be cut from discarded lead sheath or a small lead wedge. The tie shall be made in accordance with Section G50.688.3 with the lead spacer between the cables and enclosed by the finished wire tie.
