

1A1 AND 1B1 CLOSURES LOCATION

Contents	Page
1. General	1
2. Location at Pole	1
3. Closure Used as a Terminal	2

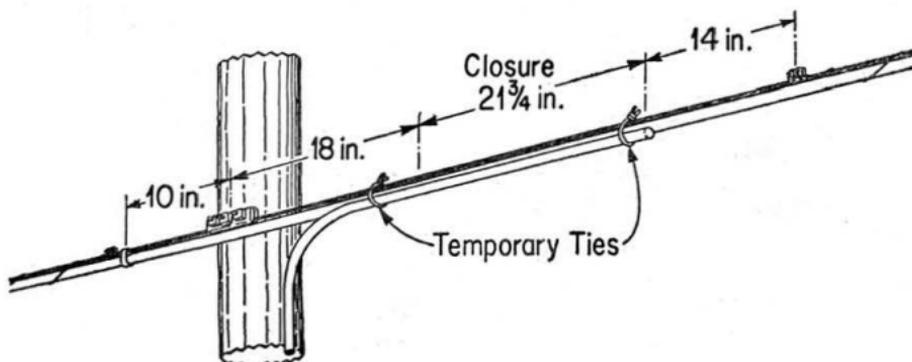

1. GENERAL

1.01 This section describes the location of the 1A1 and 1B1 Closures to enclose branch splices in aerial PIC cables.

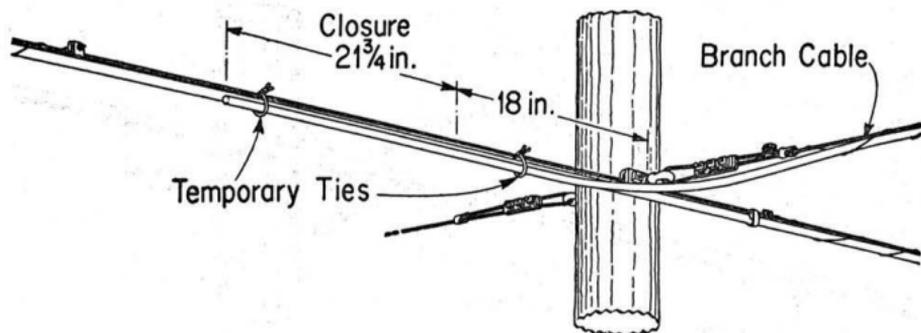

2. LOCATION AT POLE

2.01 The closure should be positioned for best arrangement of the entering cables. Do not place closer to the suspension bolt than 18 inches.

2.02 At junction of underground and aerial PIC cables.

2.03 At an aerial branch locate as shown.

2.04 Where the closure is used at a BD Cable Terminal, the closure should be located similar to the wiped joints shown in Section G61.613.2.

3. CLOSURE USED AS A TERMINAL

3.01 The 1A1 and 1B1 Closures, in addition to their use for covering branch splices, can be equipped as ready-access terminals. When this is done, locate as covered in Part 2 above.
