

AERIAL CABLE SUPPORTS
INSTALLATION

NOTES CONCERNING THIS ADDENDUM

This addendum is being issued to supplement Section G52.135.1 with additional instructions pertaining to the installation of aerial cable supports and to cancel one paragraph having instructions that do not apply in this area.

The cross-reference, "See Addendum" should be written at Paragraph 4.04 which is cancelled and at Paragraph 4.05 which is replaced herein.

4. METHOD OF INSTALLATION

4.04 Cancel

4.05 When the aerial cable support is used to support two or more cables the procedure is as follows:

(a) When a heavier cable is placed above one or more branch cables or terminal stubs; the first two wraps of the support are made around the main cable and the third wrap is made around the assembly.

(b) When the heavier cable is placed below one or more branch cables or terminal stubs; all three wraps of the support will be made around the assembly as illustrated in Paragraph 4.05.
