ADDENDUM G52.170
Issue I, February, 1933
Provisional Standard

AERIAL CABLE

LONG SPAN CONSTRUCTION

SPANS OF 150 TO 250 FEET IN LENGTH

GENERAL

The standardization of a cable suspension hook designed to permit riding the cable suspension strand past the point of support in the middle of the span without lifting the cable car makes it necessary to replace in part paragraph 8.02-(4) of Section G52.170. These instructions show the details of the method for attaching the cable suspension strand to the suspension guy by means of the cable suspension hook.

8. PLACING CABLE SUSPENSION STRAND

8.02-(4) Replace drawing with the following.
