

BLOCK AND HOUSE CABLE
ANCHORING DEVICES FOR ATTACHING
CABLES TO WALLS

NOTES CONCERNING THIS ADDENDUM

This addendum supplements Section G53.100.1. It covers additional uses for toggle bolts and screws or nails with wire ties; the sizes of clamps and straps to be used with various stub cables; and the placing of more than one cable under a single clamp.

"See Addendum" should be written at Paragraphs 2.01 and 4.01 which are supplemented and following 4.02 to indicate the inclusion of additional information.

2. ATTACHMENTS TO BUILDING SURFACES

2.01 Note: Toggle Bolts and screws or nails with wire ties may be used on stucco walls and similar surfaces as well as on hollow tile.

4. CLAMPS, STRAPS AND ASSOCIATED ANCHORING DEVICES

4.01 The following table shows the sizes of straps and clamps to be used with various types of terminal stub cables and binding post chamber stub cables.

Cable Clamp Sizes	Cable Stub Sizes Chambers Terminals		Cable Strap Sizes
6	G11	-	
7	G16	-	
8	-	10, 11	9
9	G26	10, 11, 16	
10	G26	16	11
11	H51	26	11
13	H76	-	13 or 16
13	H101	-	13 or 16
21	H303	-	24
17	-	BD101	20
21	-	BD202	24
25	-	BD303	30
30	-	BD404	36

4.03 Where a number of small cables are to be mounted on a masonry, wood or metal surface, space limitations sometimes make it impractical to use individual fasteners. A saving in space can be effected by combining these cables in one or more groups under a single cable clamp, cable strap or adjustable sleeve strap, according to the size of the cables involved.
