

## UNDERGROUND CABLE

### PULLING CABLE INTO SUBSIDIARY DUCTS

#### NOTES CONCERNING THIS ADDENDUM

This Addendum is issued to provide instructions for placing Alpeth, Stalpeth, or Corrosion Protected cable where the subsidiary duct is iron pipe.

The cross-reference "See Addendum" should be written in following Paragraph 1.02 to indicate new information.

#### 1. GENERAL

1.03 Alpeth, Stalpeth or Corrosion Protected cable shall be placed where the conduit used is iron pipe and the size of the cable, pipe and manhole will permit. This does not include house cable systems or 2 pair service cables.

1.04 In placing Corrosion Protected cable in iron pipe care should be taken to avoid damage to the Corrosion Protection since this would subject the cable to concentrated electrolytic action.
