

TERMINALS
DESCRIPTION OF INSIDE
PROTECTED TERMINALS

NOTES CONCERNING THIS ADDENDUM

This addendum supplements G61, 129 with instructions for the reporting and recording of protected building terminals.

The cross-reference "See Addendum" should be marked in G61, 129 following paragraph 1.02 to indicate additional information has been added.

1. GENERAL

1.03 Only two types of protected building terminals, as covered by this section, are carried on our records for reporting and accounting purposes, they are LB and LX:

LB - Consists of one "L" cable terminal section plus "LB" fuse chamber and associated items.

LX - Consists of any other combinations of "L" sections, including those cases where an "L" section is installed with an "LA" fuse chamber and associated equipment.

Therefore, protected building terminals, as described in this section, shall be classified into one of these two types for indicating on work prints etc.
