

MARKING MAIN FRAMES
198 TYPE TERMINAL STRIPS

NOTES CONCERNING THIS ADDENDUM

This addendum is being issued to correct ordering information for adhesive marking strips; also to provide marking information where load coils are terminated on 198A or similar type of strip.

The following paragraphs should be marked "See Addendum" and treated as indicated.

- Paragraph 2.03 - Replaced
- Paragraph 2.05 - Replaced
- Part 6 - Added

2. DESCRIPTION AND ORDERING INFORMATION

2.03 The standard listing for the E-4587 Pair Designation Strips is:

(Quantity), Form, E-4587, Group (such as A)

2.05 The standard listing for the E-4588 Cable Designation Strips is:

(Quantity), Form, E-4588, Group (such as A)

6. MARKING LOAD COIL TERMINATIONS

6.01 On main frame verticals, where load coils are terminated on 198A or a similar type of terminal strip, the terminal strip should be stenciled as shown in the following illustration. Exceptions may be made where there is insufficient space for

stenciling numbers on the side of the retaining strip. The numbers should then be stamped on the front of the strip. Where coils have previously been terminated, markings should conform to the existing plan.

Note: "Load Coils" should be stenciled on the designation board. If board is not available, markings should be placed on front of strips.
