

EXTENSION LADDERS
SAFETY PRECAUTIONS

NOTES CONCERNING THIS ADDENDUM

This Addendum supplements Section G83.620.5 with additional safety precautions to be observed when using extension ladders.

The cross-reference "See Addendum" should be written following Paragraph 1.03(v) to indicate the addition of new information.

1. SAFETY PRECAUTIONS

1.03(w) When using an extension ladder to gain access to a roof or other structure, care should be taken to avoid stepping on a rung located higher than the roof in order that the ladder will not be over-balanced to an extent that may cause it to slip.

(x) Never move a ladder on which a man is working.

(y) When raising an extension ladder, lean the ladder away so that the top section will not over-balance.
