MR. CALDERWOOD from: Engineering Director - Customer Telephone Systems

synopsis: Announces that the 757A PBX will be rerated A&M in January 1973.

* * *

Your responses to our proposed rerating of the 757A PBX to A&M only recommended that we delay this action until certain features are available with the 770A PBX that may now be provided with the 757A. As a consequence, we now plan to delay action on this rerating until January, 1973.

The features you expressed interest in and the date they will be available are as follows:

<u>Feature</u>	<u>Availability</u>
Two Digit Trunk Access	May, 1972
Mixed Length Room Numbers	May, 1972
Switched Loop Operation	June, 1972
Access to Dial Dictation	June, 1972
Access to Dial Paging	June, 1972
Access to Code Call	June, 1972
Battery Reversal option for Toll Denial	(Planned - end of 1972)
Battery Reserve	" " "
Wide Frequency Tolerant Power Supply	" " "
Connection of Incoming Central Office	" " "
Trunk to Dial Repeating Tie Line	" " "
TMS-1A Connections	" " "
