Abstract

This IL provides industry notification of the impending split of the 416 NPA.

(Includes safety liability disclaimer (if applicable), ordering information, originator's signature information)

We have been advised by Bell Canada that substantial telephone number growth in the Toronto area necessitates splitting the existing 416 NPA (area code) and the simultaneous introduction of a new 905 NPA. Both NPAs will have interchangeable central office codes (i.e., the second digit of a central office code may be any digit 0-9).

The new 905 NPA will serve the area surrounding Metro Toronto and will include cities such as Mississauga, Hamilton, Oshawa, and Niagara Falls. The 416 NPA will continue to serve the six boroughs that comprise Metro Toronto (i.e., Toronto, Scarborough, York, North York, East York, and Etobicoke).

The split of the 416 NPA is scheduled for 2:00 AM Eastern Standard Time, Saturday, October 2, 1993. There will be a permissive dialing period starting 2:00 AM Eastern Standard Time, Saturday, October 2, 1993 and ending at 2:00 AM Eastern Daylight Savings Time, Saturday March 26, 1994. During the permissive dialing period either 416 or 905 will be acceptable in a dialed number terminating in the new NPA. After the permissive period, calls dialed with incorrect NPA codes will be routed to intercept.

Switching systems in the new 905 NPA will begin transmitting "905" in the calling number Automatic Number Identification (ANI) on October 11, 1992. All ANI changes will be completed by January 1, 1994.

Test calls to verify routing to the new NPA can be made by calling 905-206-0000. This test number will become available on September 1, 1993, and remain operational for a minimum of 30 days after the end of the permissive period.

The attached map illustrates the 416 and 905 configuration after the split. A listing of the communities to be served by each area code after the split is also attached.

Canadian routing information is not included in Bellcore's LERG. Bell Canada will be mailing a list of 416 and 905 NXXs to its customers.

Title Split of 416 (Ontario, Canada) Numbering Plan Area.			Project Number(s) 422402

The dialing plan for the new 905 NPA will be the same as the existing dialing plan for the 416 NPA:

- All home NPA (HNPA) "local" calls (generally calls that do not incur a charge) must be dialed on a 7 digit basis with no prefix; i.e., NXX + XXXX (7 digits).
- All home NPA (HNPA) direct dialed "toll" calls (generally calls that incur a charge) must be dialed with a prefix "1" and 10 digits; i.e., 1 + HNPA + NXX + XXXX (1 + 10 digits)
- All "local" calls (generally calls that do not incur a charge) between the 416 and 905 NPAs will be dialed on a 10 digit basis with no prefix; i.e., 416 + NXX + XXXX or 905 + NXX + XXXX (10 digits).
- All foreign NPA (FNPA) direct dialed "toll" calls must be dialed with a prefix "1" and 10 digits; i.e., 1 + FNPA + NXX + XXXX (1 + 10 digits).
- Operator assisted calls including credit card calls, collect, and third party calls will be dialed with a "0" prefix and 10 digits; i.e., 0 + NPA + NXX + XXXX (0 + 10 digits).

Operational questions concerning the split of the 416 and the introduction of the new 905 NPA may be referred to Jim Rivett, Bell Canada, on (416) 581-7557 or Vic Doughty, Bell Canada, on (416) 353-3639.

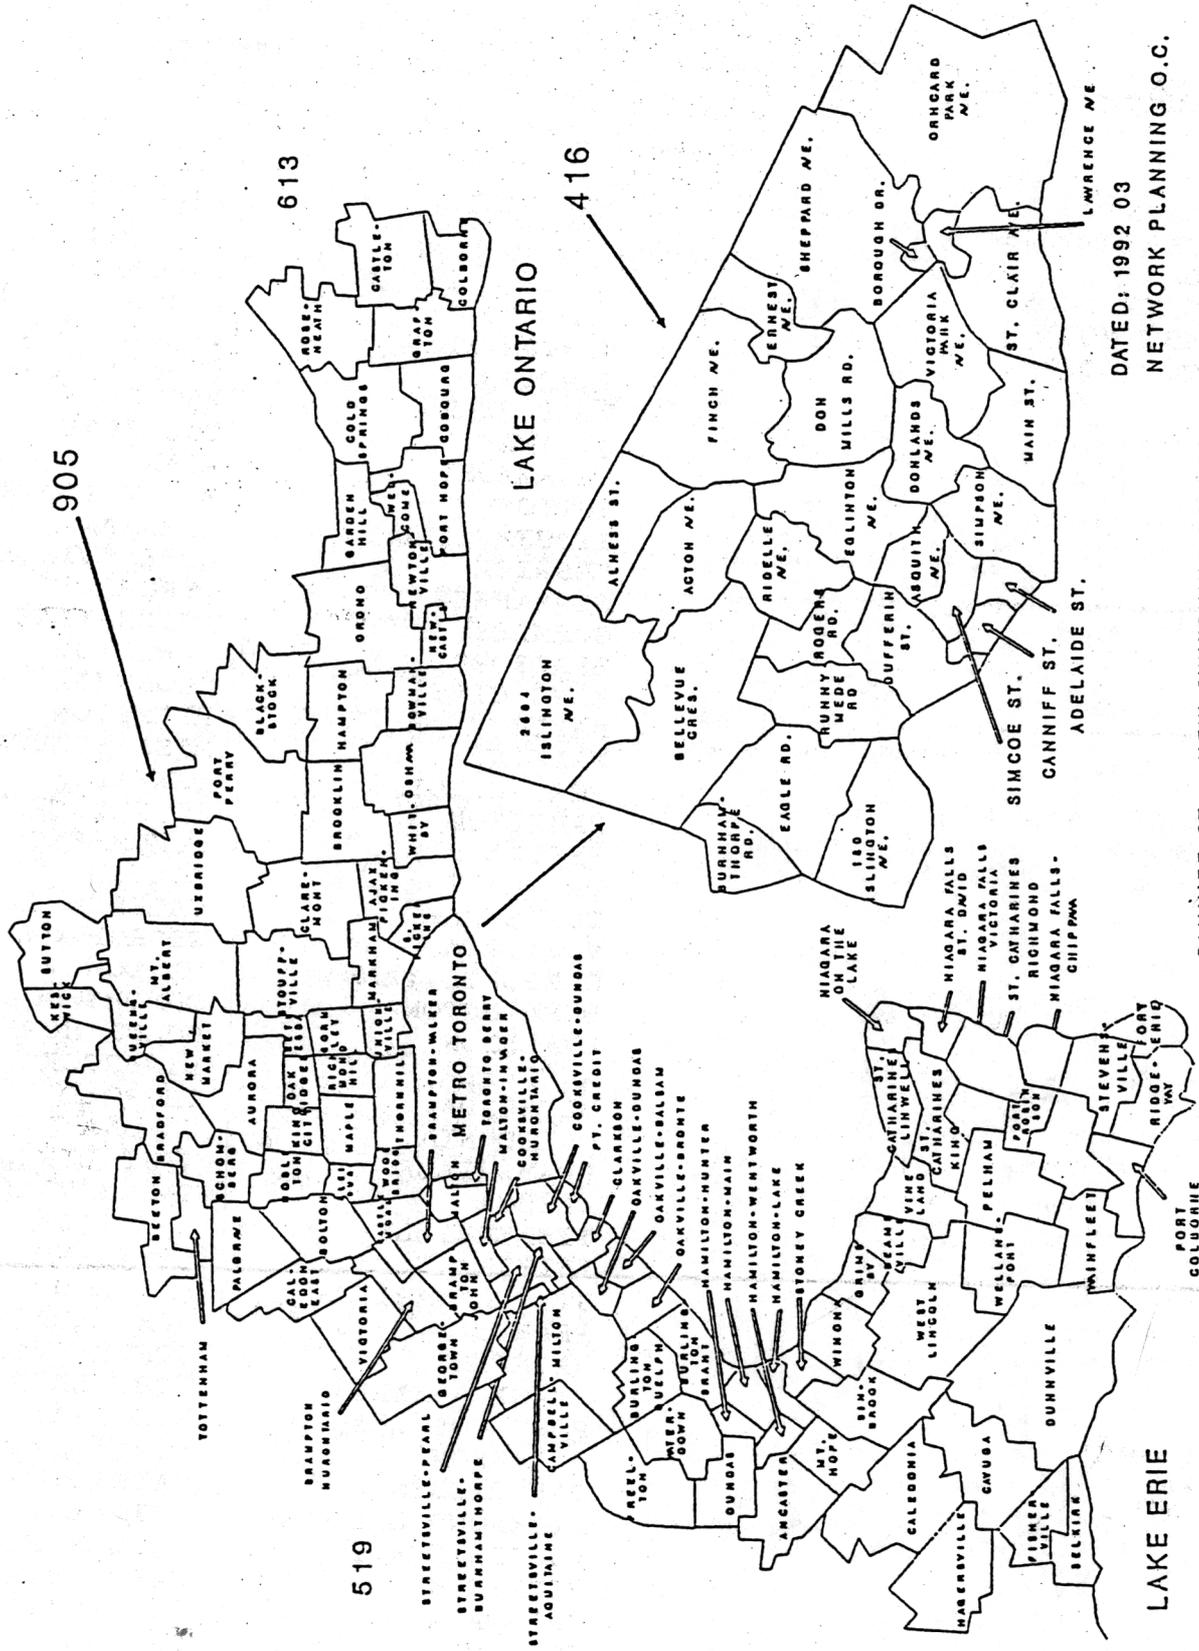

Copies of this letter are being forwarded to achieve the widest possible industry distribution and may be reproduced for further distribution as needed. Questions concerning the contents of this letter may be referred to Garry Benoit, Bellcore, at (201) 740-4592.
