J. N. Deak - North American Numbering Plan Administration

Abstract:

This IL provides industry notification of the impending split of the 708 NPA.

Letter Information (includes safety liability disclaimer (if applicable), ordering information, originator's signature information)

We have been advised by Ameritech of a modification in the 708 NPA relief plan that was published in Bellcore Information Letter IL 94/08-004, dated August 9, 1994. The original plan called for an overlay of the 630 NPA covering the same geographic areas as the 708 and 312 NPAs. The new plan calls for a three-way geographic split of the 708 NPA and the introduction of the 630 and 847 NPAs. The following is a description of this relief plan.

South suburban Cook County and most of the near west Cook County suburbs will retain the 708 NPA. The new 847 NPA will serve wireline customers (e.g., POTS) in the north and northwest suburbs. DuPage County, southern Kane County, and portions of Kendall County wireline customers will be served by the 630 NPA. Wireless customers (e.g., cellular, pagers, etc.) will not be required to undergo number changes to the new NPAs and may be served by any of the three NPAs. Currently, wireless carriers are utilizing 630 NPA numbers.

The split of 708 NPA will be done in two phases. The first phase involves the introduction of the 847 NPA and is scheduled for 2:00 AM CST on January 20, 1996. The permissive dialing period also begins at the same time on January 20, 1996 and will be in effect until mandatory dialing begins at 2:00 AM CDT on April 20, 1996. During the permissive period, either the 708 or 847 NPA will be acceptable in a dialed number terminating in the new 847 NPA.

The second phase of the split involves the transfer of existing 708 wireline customers to the 630 NPA, and is scheduled for 2:00 AM CDT on August 3, 1996. The permissive dialing period, also begins at the same time on August 3, 1996 and will be in effect until mandatory dialing begins at 2:00 AM CST on November 30, 1996. During the permissive dialing period, either 708 or 630 NPA will be acceptable in a dialed number terminating in the new 630 NPA.

After the permissive periods have ended for each of the phases, calls dialed with incorrect NPA codes, as defined in the NPA split information published in the Local Exchange Routing Guide (LERG), will be routed to intercept. Changes in the local exchange routing information will be incorporated into the LERG and the NPA NXX Activity Guide (NNAG).

Letter Number IL-95/07-015	Type Informational	Date 7/27/95	Page No. 2
Title NANP-Split of 708 (Illinois) Numbering Plan Area (NPA)		See Change Request Project Numbered 5V1000.17	

The attached map illustrates the 630, 708, and 847 NPA configuration after the split. A listing of the wire centers to be served by the 630, 708, and 847 NPAs is also included.

Effective immediately, test calls to verify routing to the 630 and 847 NPAs can be made by dialing 630-204-1204 and 847-958-1204, respectively. A recorded announcement will indicate that the test call has been successfully completed. The 630 test number will be disconnected on August 3, 1996 and the 847 test number will be disconnected on January 20, 1996.

The dialing plan for the 630, 708, and 847 NPAs will be as follows:

- All home NPA (HNPA) calls, both local calls and toll calls (generally calls that incur an additional charge), will be dialed on a seven digit basis with no prefix, i.e., NXX-XXXX (7 digits).
- All foreign NPA (FNPA) calls, both local calls and toll calls, will be dialed with a prefix "1" and ten digits, i.e., 1 + FNPA + NXX + XXXX (1 + ten digits).
- All operator assisted calls (both HNPA and FNPA) including credit card, collect, and third party calls will be dialed with a "0" prefix and ten digits, i.e., 0 + NPA + NXX + XXXX.

Operational questions concerning the split of the 708 NPA and the introduction of the 630 and 847 NPAs may be directed to Jerry Waller, Ameritech, at (414) 523-8822.

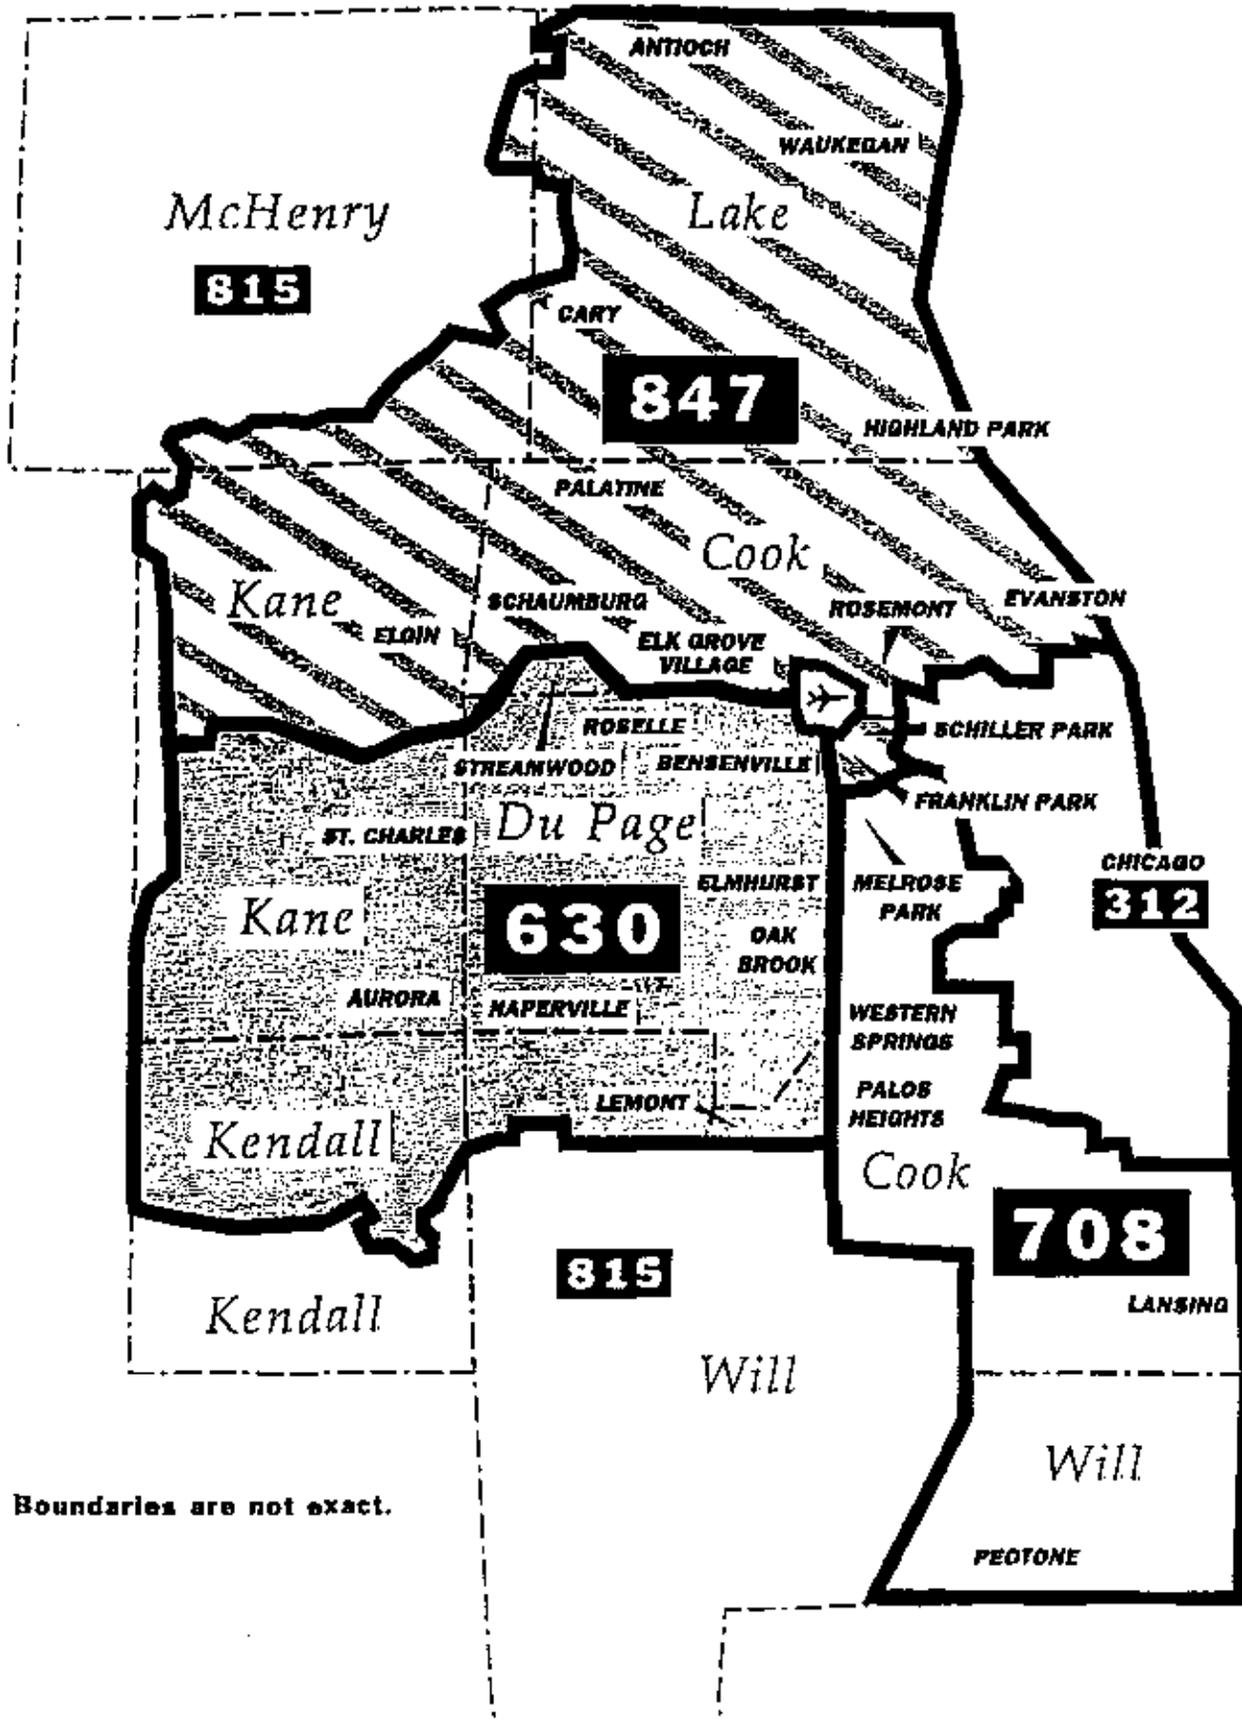

Copies of this letter are being forwarded to achieve the widest possible industry distribution and may be reproduced for further distribution as needed. Questions concerning the contents of this letter may be referred to Jim Deak, Bellcore, at (908) 699-6612.
