

TROUBLE OPERATORS

MISCELLANEOUS CONDITIONS

1. CALLS FROM LONG DISTANCE FOR LINES AFFECTED BY MULTIPLE MARKINGS.
 - a. Under certain conditions, principally on calls from lines affected by temporary disconnects, vacation rate and calls from office disconnects, the long distance operator must communicate with the calling party in order to inform him that his call cannot be completed. If you receive a request for connection from such a line from long distance, establish connection to the line, removing the signal plug if necessary. If it is necessary to remove the signal plug, place a Tiger clip on the completing cord of the pair used, to remind you to reinsert the signal plug as soon as the connection is taken down. Extreme care should be taken in this latter case, since once the connection is taken down it will be very difficult to remember where to reinsert the signal plug.
