

J68331A TRANSMITTER-RECEIVER BAY

1. GENERAL

1.01 This section outlines the maximum testing intervals for maintenance tests and adjustments. Reference should be made to Section R90.314 for the methods of making these tests:

(a) Weekly:

Check All Operating Voltages and Currents

(b) Monthly:

Check Over-all Bay Performance and Alignment
Check Operation of Low-power Alarm
Check Activity of Short-life Tubes

(c) Semi-annually:

Check Activity of Tubes
Clean Relays and Check Performance
Inspect all Connectors
