

Replacing Issue of July 28, 1922, which should be removed from the binder and destroyed.

**THE CHESAPEAKE AND POTOMAC TELEPHONE COMPANY
AND ASSOCIATED COMPANIES.**

Engineering Circular No. 244-B.

Insert No. 1—A. T. & T. Specs. No. 4159

Issue No. 2. December 10, 1924.

A. T. & T. Company's Specifications No. 4159—"Maintenance of Automatic Electric Company Dials at Substations."

A. T. & T. Company's Specifications No. 4159—"Maintenance of Automatic Electric Company Dials at Substations," together with Supplement "A"—"New Tools and Methods" are approved as a part of the standard hand book specifications for use in The Chesapeake and Potomac Telephone Company and Associated Companies.

These specifications cover standard tools and repair parts to be used in the maintenance of Automatic Electric Company Dials at substations.

Supplement "A" covers the use of the No. 265 tool for cleaning dial contacts and a new practice for oiling certain of the bearings of these dials.

The issue of Engineering Circular No. 244-B dated July 28, 1922, should be removed from the binder and replaced by this circular.

C. A. ROBINSON,
Chief Engineer.

HANSE HAMILTON,
General Plant Manager.
