

## Certification Summary

<b>Partner</b>	EMC
<b>Partner Code</b>	EMC
<b>User</b>	yaodong.zhang@emc.com
<b>Request Name</b>	RP_SRA2.3_SRM82_b51
<b>Certification Type</b>	sra-certid
<b>Certification Name</b>	SRM Cert ID
<b>Version</b>	1.0
<b>Certification ID</b>	EMC-0-63a3a-78d91

## Responses

### SRA Information

Question	Answer	Details
Full SRA name	RecoverPoint SRA	
Fully qualified SRA version	2.3.0.0	
SRM versions intended for certification	Other: Release Candidate	
Access protocols supported by the SRA	FC;iSCSI	
SRA installer MD5 checksum	36692741AAf2409D90E2C3F68B0B8364	

### Management and Replication Information

Question	Answer	Details
Official name of array management software or firmware	RecoverPoint	
Supported versions of array management software or firmware	5.1.3.0	
Official name of array based replication software or firmware	RecoverPoint	
Supported versions of array based replication software or firmware	5.1.3.0	

### Non-Writable Storage (NWS) Requirements

Question	Answer	Details
Does the SRA require target volumes to be presented in any non-writable state?	Yes	
Specify the non-writable state unpromoted replicas will be in from the storage array perspective	NA	
Specify the sense data that the array will return to the host for any read capacity command from the host	NA	
Does the array ever return any other sense key or status code when replica is in NWS?	No
