

## Certification Summary

<b>Partner</b>	Seagate Technology LLC
<b>Partner Code</b>	sea
<b>User</b>	jeff.cloud@seagate.com
<b>Request Name</b>	STX_SRA8.3.0.8_LNX
<b>Certification Type</b>	sra-certid
<b>Certification Name</b>	SRM Cert ID
<b>Version</b>	1.0
<b>Certification ID</b>	

## Responses

### SRA Information

Question	Answer	Details
Full SRA name	Exos X SRA	
Fully qualified SRA version	8.3.0.8	
SRM versions intended for certification	SRM 8.2	
Access protocols supported by the SRA	FC;iSCSI	
SRA installer MD5 checksum	456F3D04E166297D4B281EB310EC22E6 - exos-x-sra-8.3.0.8.tar	

### Management and Replication Information

Question	Answer	Details
Official name of array management software or firmware	I200 embedded in Array FW	
Supported versions of array management software or firmware	I200	
Official name of array based replication software or firmware	AR (embedded in array FW)	
Supported versions of array based replication software or firmware	I200	

### Non-Writable Storage (NWS) Requirements

Question	Answer	Details
Does the SRA require target volumes to be presented in any non-writable state?	No	
Specify the non-writable state unpromoted replicas will be in from the storage array perspective	Unmapped	
Specify the sense data that the array will return to the host for any read capacity command from the host	ILLEGAL REQUEST/LOGICAL UNIT NOT SUPPORTED (5/25/00)	
Does the array ever return any other sense key or status		

code when replica is in NWS?	No
