

Certification Summary

Partner	Huawei Technologies Co., Ltd.
Partner Code	HSC
User	tangrong14@huawei.com
Request Name	SRA 2.6-new
Certification Type	sra-certid
Certification Name	SRM Cert ID
Version	1.0
Certification ID	HSC-0-9f1b2-43ee0

Responses

SRA Information

Question	Answer	Details
Full SRA name	Huawei eSDK_Storage_SRA	
Fully qualified SRA version	2.6	
SRM versions intended for certification	SRM 8.2	
Access protocols supported by the SRA	FC;iSCSI;NAS	
SRA installer MD5 checksum	2fb3a6d17363aa95e8602b7ce512f809	

Management and Replication Information

Question	Answer	Details
Official name of array management software or firmware	OceanStor DeviceManager	
Supported versions of array management software or firmware	6.0 and later	
Official name of array based replication software or firmware	HyperReplication, HyperMetro	
Supported versions of array based replication software or firmware	6.0 and later	

Non-Writable Storage (NWS) Requirements

Question	Answer	Details
Does the SRA require target volumes to be presented in any non-writable state?	No	
Specify the non-writable state unpromoted replicas will be in from the storage array perspective	NA	
Specify the sense data that the array will return to the host for any read capacity command from the host	NA	
Does the array ever return any other sense key or status code when replica is in NWS?	No
