☎ 17077285922 - How to Fix the WordPress White Screen of Death

Written By: Erica S Terner

INTRODUCTION

The entirely white empty page that appears on your WordPress website is often known as the **WordPress white screen of death**.   But you should not take tension because this WSOD error is easy to solve. Here are some tips that help in solving the white screen of death error.

Check your .htaccess file and remove corrupt one and generate a new .htaccess file.

Check themes of your website and deactivate them if they are causing the issue. This will solve the WSOD error.

Remove bad plugins as it can also cause an error on the website. After removing plugins, check your website. If it is normal, then the plugins were the real reason, and if not, then contact the WordPress team.
