

# 1985-1988 Volvo 740 Jacking Rear Wheels

This guide will show how to properly raise the back wheels of the car off the ground so work can be done on rear tires/wheels.

Written By: Isaac Nitschke

## INTRODUCTION

In order to perform several of the repair guides for the Volvo 740, the rear wheels of the car must be raised off the ground. This guide will show you how to do this using a hydraulic car jack and jack stands.

### TOOLS:

- [Hydraulic Floor Jack](#) (1)
- [Jack Stand](#) (1)

## Step 1 — 1985-1988 Volvo 740 Jacking Rear Wheels

- Turn car off and remove keys from ignition.
- Place car in park (automatic) or neutral (manual).
- Engage parking brake.

## Step 2

- Use hydraulic jack on frame of car to raise car.
- Place jack head underneath frame couple (pictured).

*(i)* Only necessary to jack the car until the wheels are just off the ground.

## Step 3

- Place jack stand on frame of car and remove jack.

**⚠** Do not work under car supported only by hydraulic jack, serious injury or death may result.

To reassemble your device, follow these instructions in reverse order.
