

1992-1999 BMW 3 Series Battery Replacement

Disconnect the battery in your BMW E36.

Written By: Geoff Wacker

INTRODUCTION

Use this guide to disconnect the trunk-mounted battery in your BMW E36. This procedure was done on a US 1997 M3.

Step 1 — Battery

- Remove the battery cover by pressing in the retaining tab, and then gently lifting.

Step 2

- Disconnect the negative (-) cable from the battery by loosening the 13 mm nut securing the cable to the battery terminal.
- Cover the negative terminal with insulating material.

To reassemble your device, follow these instructions in reverse order.
