

2003-2007 Honda Accord Battery Replacement

Do you hear that "click-click-click" sound when you turn the ignition and your car won't start? It may be time to replace the battery.

Written By: Johnny Hernandez

INTRODUCTION

Without a working battery, your car won't start. Replacement is the best long-term solution for this for a dead battery. You could get a boost from another car using jumper cables, but there's a chance the battery will die soon afterwards. Although the chance of shocking yourself is not very high, grounding yourself is recommended. Wearing rubber gloves is also recommended.

TOOLS:

- [Socket Wrench \(1\)](#)
- [10mm Socket \(1\)](#)
- [Shop Towels or Rags \(1\)](#)
- [Flathead 3/32" or 2.5 mm Screwdriver \(1\)](#)

Optional

- [Large Needle Nose Pliers \(1\)](#)

Optional

- [Memory Saver \(1\)](#)

Optional

Step 1 — Battery

- Locate the latch to open your hood, normally located by your left foot when sitting in the driver's seat.
- After lifting the latch, open your hood and securely hold it up.

Step 2

⚠ You will lose your radio station presets and clock time if you do not use a Memory Saver. One will NOT be used in this guide.

- The battery is located on the front driver's side of the vehicle.
- Begin using your ratchet to loosen and remove the negative (black) cable from the terminal.
- *(i)* You can use a rag or towel to cover the cable in order to prevent a short.

Step 3

- Loosen and remove the positive (Red) cable from the terminal.

Step 4

- Remove the cross-bar that holds the battery in place by loosening both bolts.
- Lift out the bracket.

Step 5

- Remove the battery by lifting it straight up and out.
- *(i)* Avoid tilting the battery in order to prevent an acid spill.

Step 6

- Replace with a new battery.
- Secure the battery cover back in place.

Step 7

- Place the cross-bar back in place.

i When placing the cross-bar back in, make sure the bars are properly hooked into place.

Step 8

- Repeat the steps in reverse order to properly secure battery.

Step 9

- Start your car in order to make sure all of your electronic components are working properly.

To reassemble the battery, follow these instructions in reverse order.
