

2006 (convertible) Ford Mustang Weatherproofing Car Window Replacement

Weatherproofing car window replacement for 2006 (convertible) Ford Mustang.

Written By: Abdelaziz Alqisy

INTRODUCTION

Weatherproofing car window for a convertible Ford Mustang 2006. This project will assist in providing a solution for people who have noticed a lot of wind noise in their car or water leaking inside the car. This guide will ensure people will have a good condition weatherproofing car window that is ready for any rain or snow or even car wash.

TOOLS:

- [Towel](#) (1)

PARTS:

- [Middle Side Rail Weatherstrip Driver Side Convertible 2006](#) (1)

Step 1 — Weatherproofing Car Window

- Driver side weatherproofing car window.

Step 2

- Locate the both ends of the weather stripping.

Step 3

- Pull down the weather stripping from the middle.

Step 4

- In each side of the weather stripping, you will find one plastic nail.
- Take off these two plastic nails with your hand.

Step 5

- Remove the old weather stripping.

Step 6

- Clean any dust from where you took out the old weather stripping.

Step 7

- Bring the new weather stripping.

Step 8

- Starting from both sides, push the two plastic nails into the holes.

Step 9

- Push the weather stripping from the middle with your fingers.

Step 10

- Make sure it is aligned.

To reassemble your device, follow these instructions in reverse order.
