

# 2012 Ford Fusion Brake Light Replacement

Replace your brake light when it is not illuminating when pressing on the brake.

Written By: Christian

## INTRODUCTION

Make sure that the car has been off for 15 minutes because the brake light bulb may be hot.

### TOOLS:

- [Flathead Screwdriver \(1\)](#)
- [Door Panel Removal Tool \(1\)](#)

## Step 1 — Brake Light

- Locate the button that opens the trunk

## Step 2

- Locate plastic fasteners and remove with door panel remove tool/flathead by prying them off

## Step 3

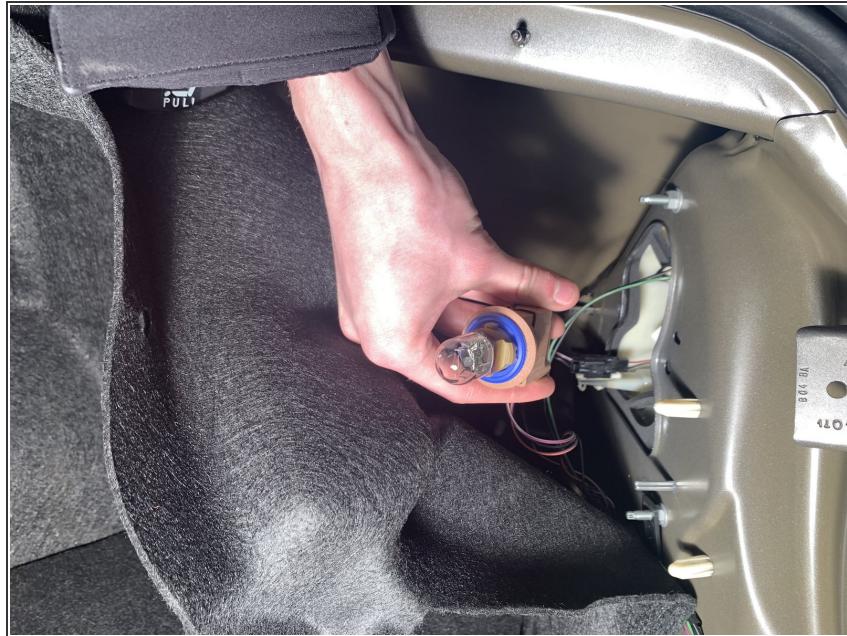

- Pull tab and remove trunk cover

## Step 4

- On the inside of the trunk remove the side panel to locate the brake light bulb

## Step 5

- Pull the Brown housing that holds the brake light

## Step 6

- Remove brake light from housing by pulling it out gently and replace with new bulb

To reassemble your taillight bulb, follow these instructions in reverse order.
