Step 3

- Gently pry the plastic ring from around the charging plate with the metal spudger.

- Remove the outside shell by pressing against the center of the charging plate and pulling the bottom shell away from the top shell.
Step 4

- Remove the five 2mm T4 screws and pull off the charging plate assmebly with the t4 screw driver.

Step 5

- Gently pry the plug off the port on the circuit board with a plastic opening tool.

- Remove the four 2mm T4 screws and take off the circuit board with a T4 screw driver.

Step 6

- Remove the five 4mm T4 screws around the battery assembly with a t4 crew driver.

- Lift the battery assembly and gently pry the plug out of its port on the board below with a plastic opening tool.

- Press the battery from the back of the battery assembly to remove it with a plastic opening tool until the glue releases the battery.

  ⚠️ Do not puncture or bend the battery. Use a small amount of heat to assist in softening the adhesive if necessary.

To reassemble your device, follow these instructions in reverse order.
