## INTRODUCTION

The front and rear cameras can sometimes break or malfunction, and must then be replaced to continue to be able to take pictures and video.

### TOOLS:

- [Tweezers \(1\)](#)
- [iFixit Opening Tools \(1\)](#)
- [Phillips #000 Screwdriver \(1\)](#)
- [Soldering Workstation \(1\)](#)
- [Spudger \(1\)](#)

### PARTS:

- [AKASO KingPad A90 Camera Unit \(1\)](#)

## Step 1 — Camera (Rear and Front) Unit

- Remove screws.
- Insert spudger tool on the middle of the left side, between the white and black plastic.
- Slide in a plastic opening tool and use it to further pull the back off.
- Work your way around the edge of the tablet with the plastic opening tool and insert more as needed.
- Pull off the back cover.

## Step 2

- Locate the camera unit and note where it is attached to the motherboard.
- Grasp the camera unit with tweezers or fingers, and pull firmly to remove it from the adhesive holding it to the motherboard.

**⚠** Be careful when lifting up the camera unit. Don't tear the ribbon cable! Ensure that you examine the second picture of this step.

- Using the spudger, carefully loosen the slot's plastic cover piece holding the ribbon cable in place.
- Pull the ribbon cable out.
- Remove the old adhesive with tweezers.

## Step 3

- Apply a small square of new adhesive in the same spot as the old adhesive was previously.
- Gently slide the new camera unit's ribbon cable into the slot.
- Give the ribbon a firm push to make sure it has made contact.
- Press the plastic cover piece back in place with the spudger.
- Firmly press the new camera onto the adhesive, making sure to line it up correctly.

## Step 4

- Replace the back cover with the new camera unit in place.
- Gently press the speaker into place.

**⚠** Don't let the volume rocker unit fall out of place.

- Replace the screws.
