---

## INTRODUCTION

This guide will show you how to replace/upgrade the M.2 SSD in your ASUS.

### TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

## Step 1 — SSD

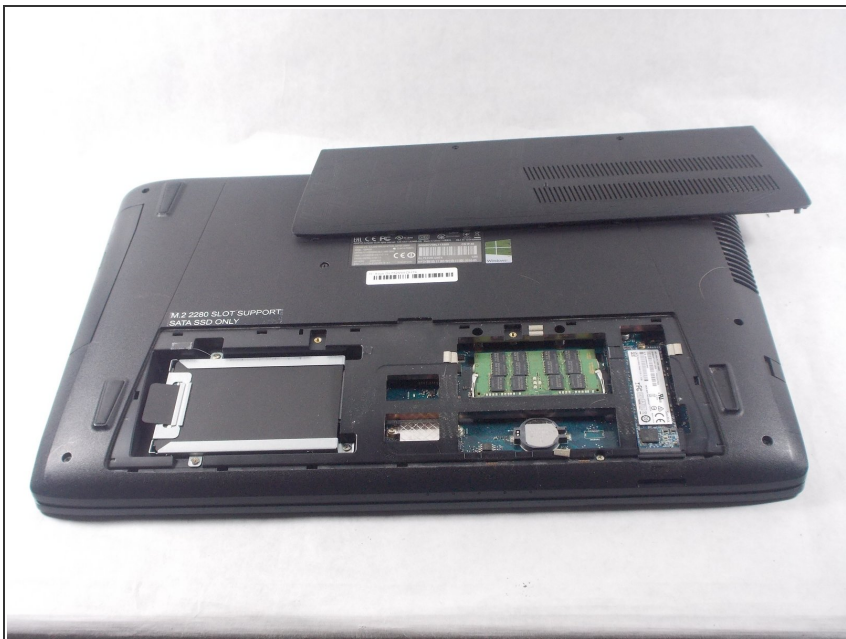

- Unscrew both 8mm phillip's head screws that hold on the access gate.

## Step 2

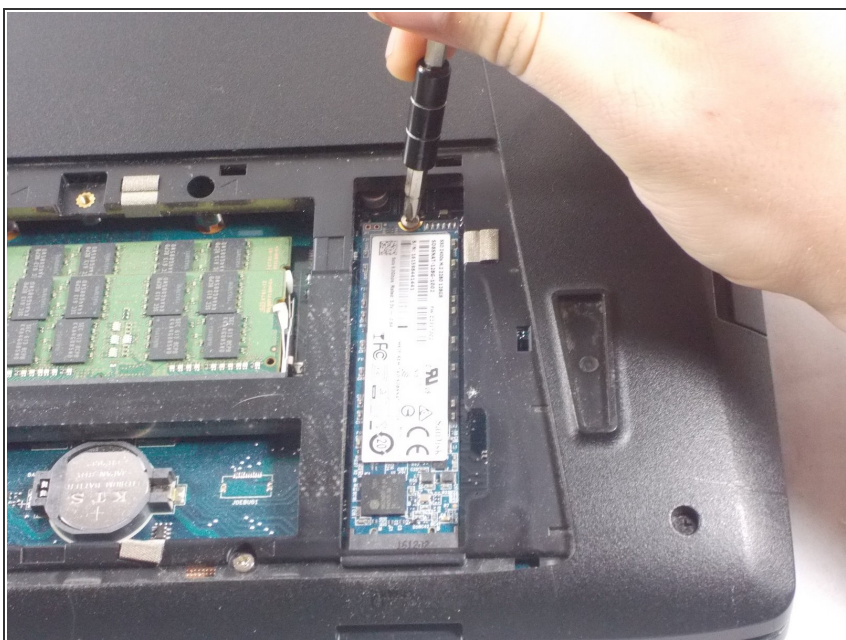

- Use either the your finger, the screw driver, or a spudger to pop out the gate.

## Step 3

- From here, you can access the harddrive, motherboard, SSD, and RAM.

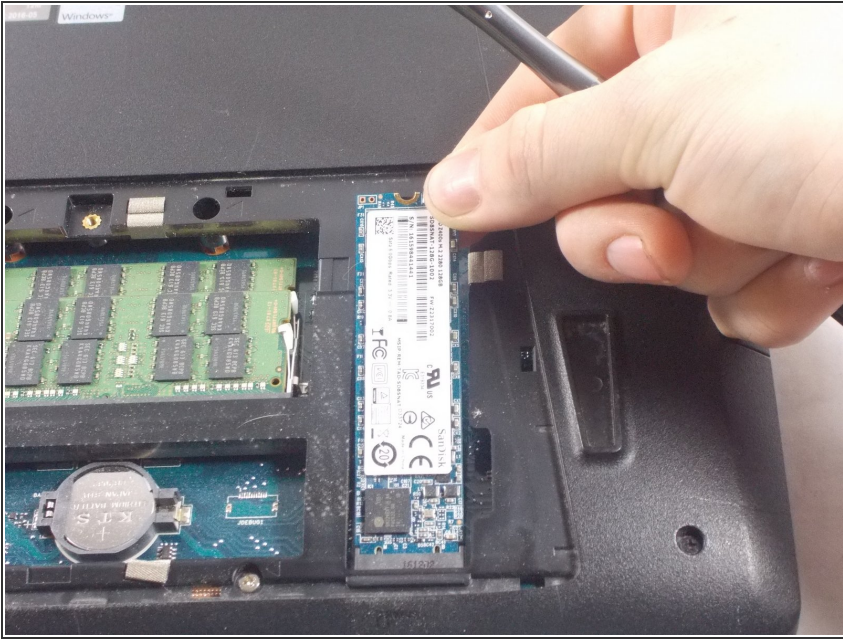

## Step 4

- Remove the 4mm screw holding in the SSD.
- ⓘ Note that the screw is holding it down so it will pop up once the screw is removed.

## Step 5

- Remove SSD from slot.

To reassemble your device, follow these instructions in reverse order.
