

ASUS MeMO Pad 7 (ME572C) Rear Camera Replacement

Replacing the rear camera for a Asus MeMO Pad 7 to get to it to work again

Written By: Efe Guldogan

INTRODUCTION

This guide will show you how to replace the rear camera for a Asus MeMO Pad 7. If you try to take a picture from the rear camera and it is not working at all, this guide will help to replace your rear camera and make it work.

TOOLS:

- [Tweezers](#) (1)
- [Spudger](#) (1)
- [Phillips #000 Screwdriver](#) (1)
- [iFixit Opening Tools](#) (1)

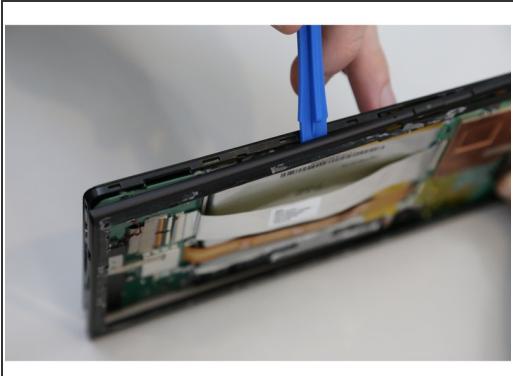

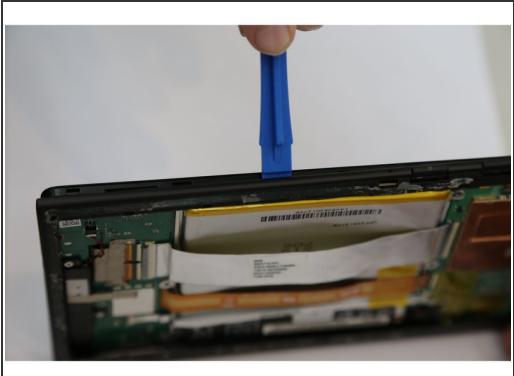

Step 1 — Rear Panel

- Make sure your device is turned off. Then with a plastic opening tool, carefully remove the back panel by carefully working your way around the perimeter.

 The panel will be glued on and requires pressure to open.

Step 2

- After removing the rear panel, use a plastic opening tool to remove the frame of the tablet.
- Start in the middle of the top side and insert a plastic opening tool between the screen and the frame.
- Carefully run the plastic opening tool along all the edges of the tablet.

Step 3

- When you take the rear panel and the frame out, place the rear panel and the frame away from the device.

Step 4 — Battery

- Disconnect the ZIF connectors to release the data cables holding the battery in. Use tweezers to do this.

(i) You can also use your hand to remove ZIF connectors.

⚠ ZIF connectors are delicate so be careful when you are removing them.

Step 5

- Find the place where the battery connector is. Disconnect the battery connectors by carefully pulling up on them using a spudger or plastic opening tool.

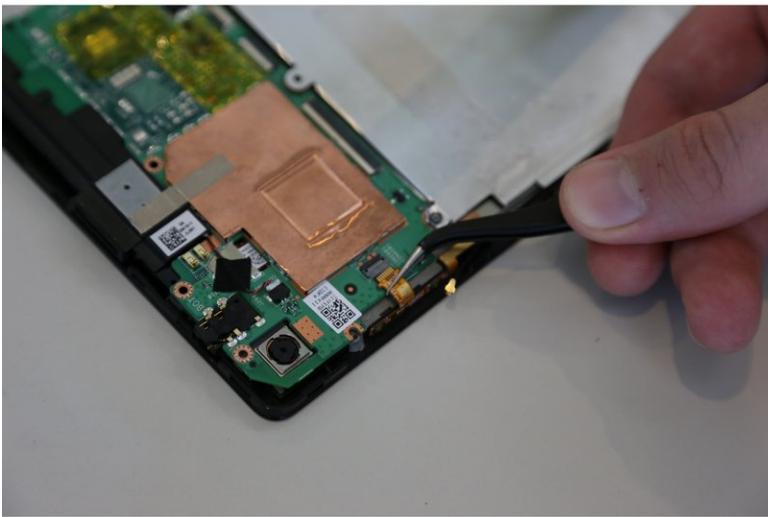

Step 6

- Using a plastic opening tool carefully pry the battery loose. The battery is glued to the pad; slight pressure will be needed to remove the battery.

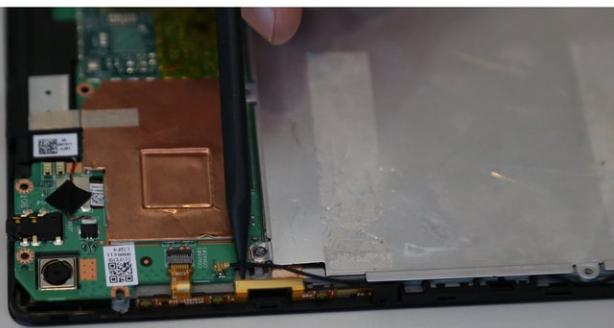

⚠ The casing of the battery is soft and can easily tear. Tearing can lead to the chemicals in the battery to leak out.

Step 7 — Motherboard

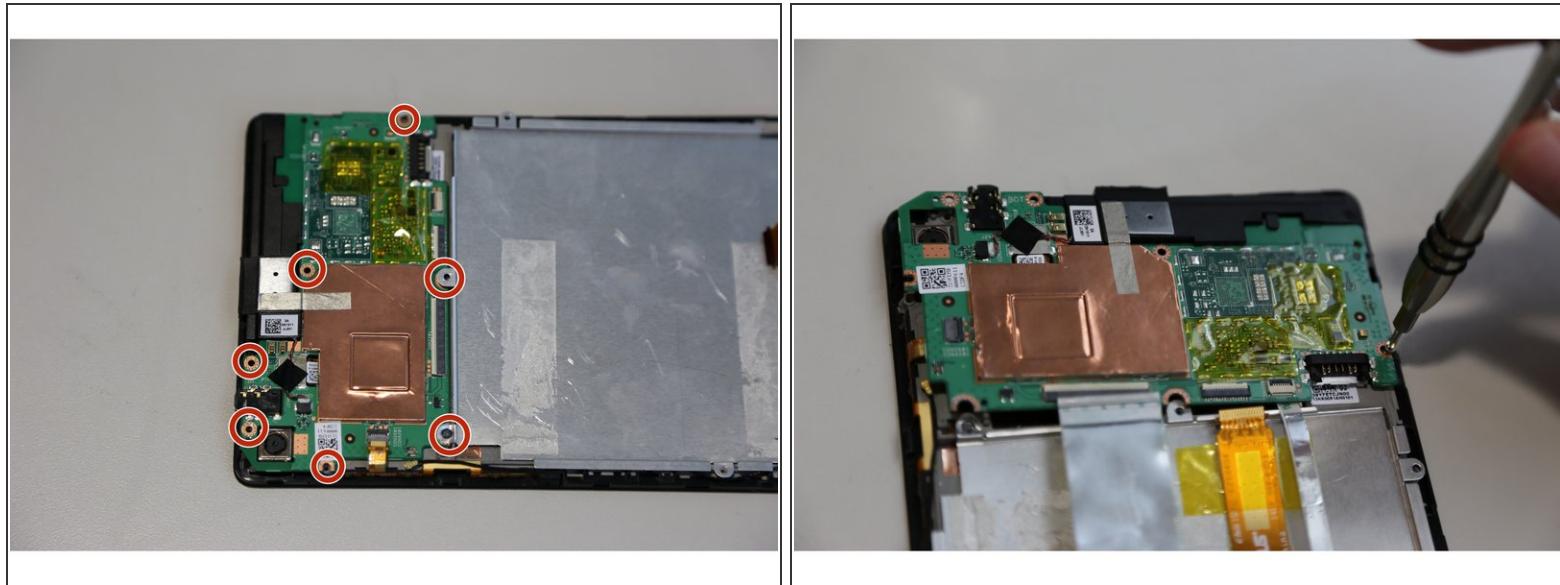

- After removing the battery from the device, locate the volume connectors on the side of the device.
- Using tweezers, carefully remove the volume connectors and place it to the side.

Step 8

- Locate the GPS antenna. Pry off the GPS antenna cable with a spudger.

Step 9

- Locate seven 2mm Phillips #0 screws attaching the motherboard to the pad. Remove the screws with a Phillips #000 screwdriver.

 Place your screws somewhere you will remember they are at.

Step 10

- Once all the screws are taken out, you can remove the motherboard. Carefully, take the motherboard out with a plastic opening tool.

Step 11 — Rear Camera

- Flip the motherboard and find the place where the rear camera connector is.

Step 12

- Using tweezers, carefully remove the rear camera connectors and place it to the side.

To reassemble your device, follow these instructions in reverse order.
