Step 3 — Optical Drive
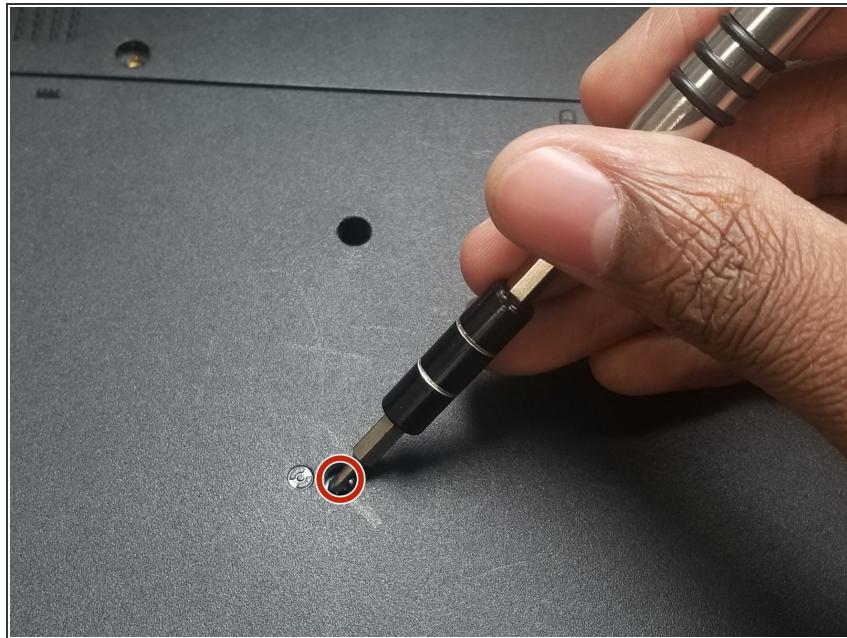

- Remove the one screw above the battery port.

- (i) This device was missing its screws on the back cover when we received the device. As a result, we do not know what head type the screws are, along with their lengths.

Step 4
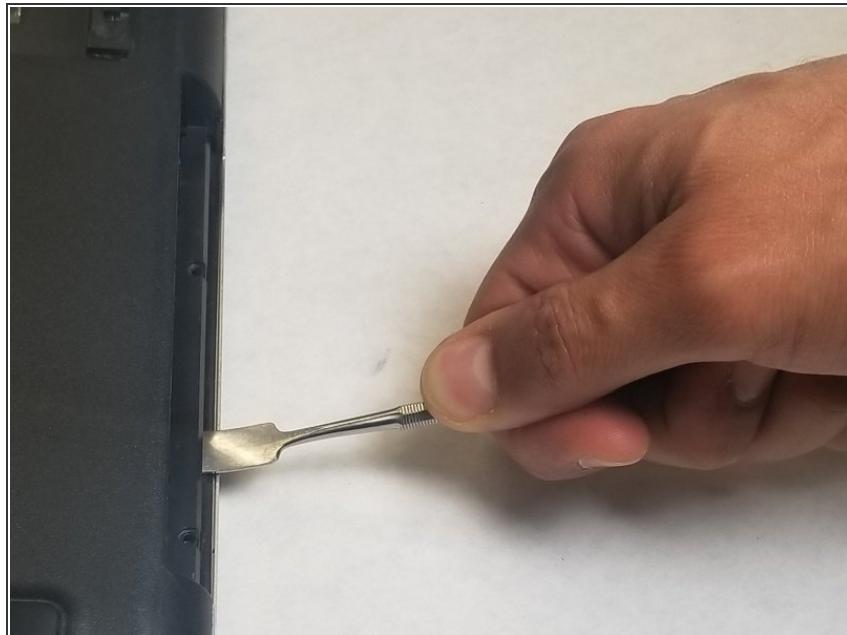

- Use a metal spudger to dislodge the optical drive from the connector.

Step 5
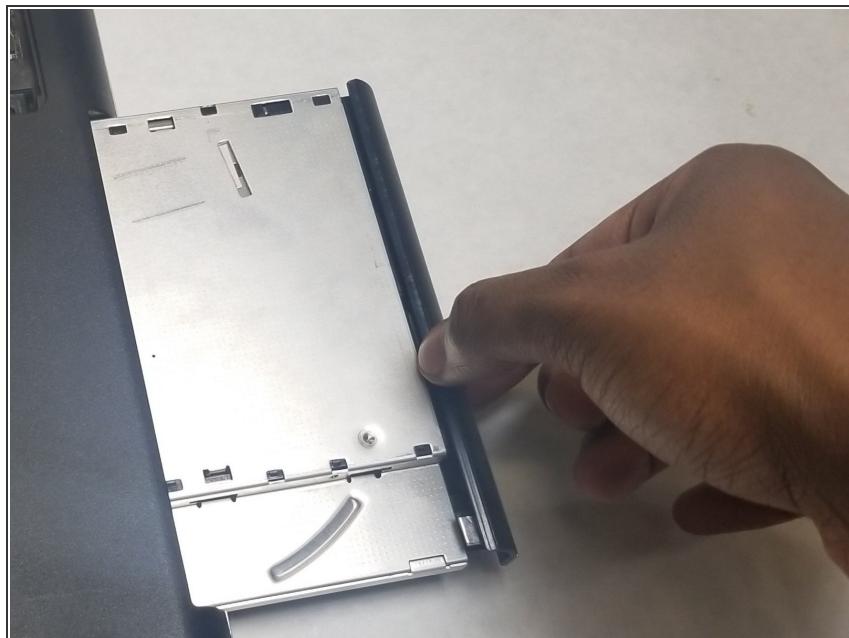

- Pull out the optical drive.

To reassemble your device, follow these instructions in reverse order.
