

ASUS N56JR-MH71 RAM Replacement

This guide will show you how to remove the RAM from the ASUS N56JR-MH71 laptop.

Written By: Ruben Lopez

INTRODUCTION

If you want to upgrade memory, this guide will show you how to replace the RAM. Be sure the type of RAM used is DDR3L SDRAM.

TOOLS:

- [Essential Electronics Toolkit](#) (1)
-

Step 1 — Battery

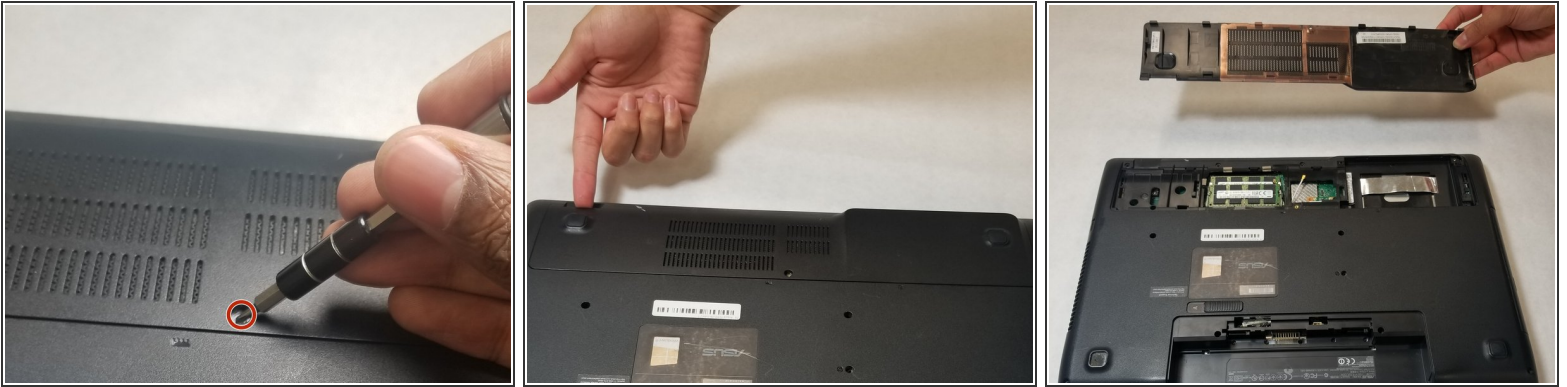

- Push the battery latch.

Step 2

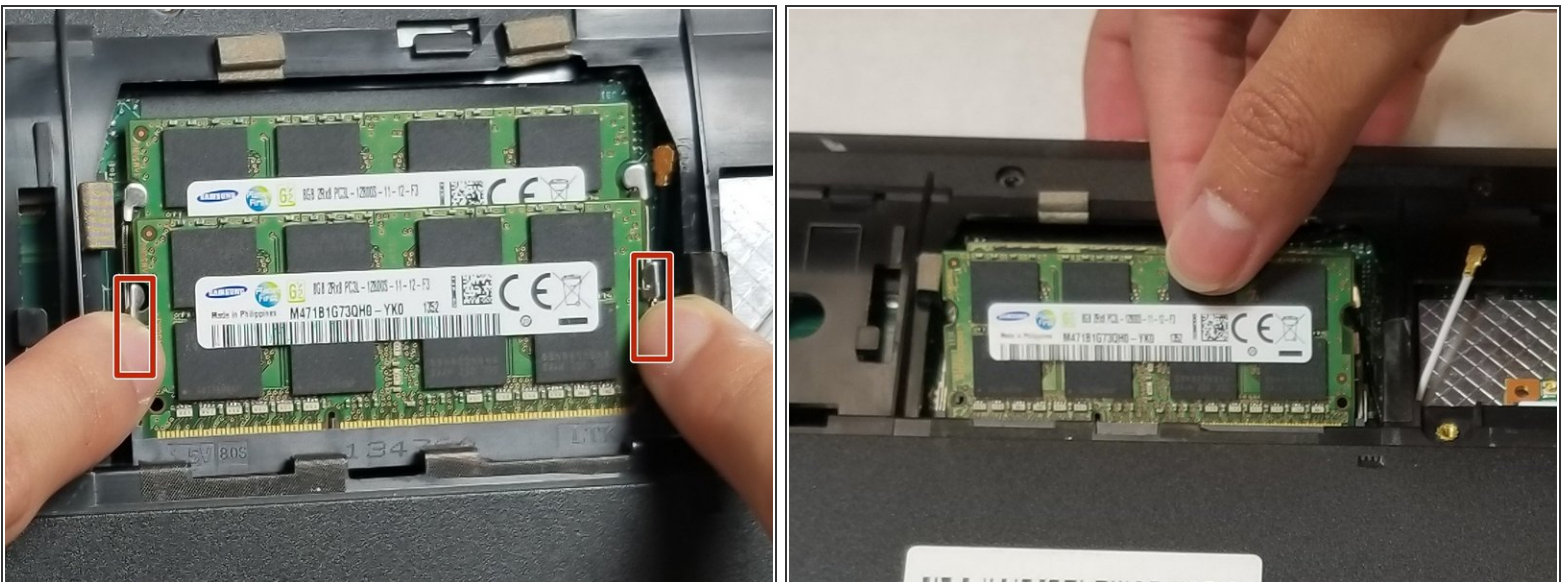

- Keep the battery latch held while you remove the battery.

Step 3 — RAM

- Remove the one screw securing the back cover.
 - Pry off the cover using a finger.
- i** This device was missing its screws on the back cover when we received the device. As a result, we do not know what head type the screws are, along with their lengths.

Step 4

- Push the clips outwards using two fingers.
 - Lift the RAM to remove it from the slot.
- i** Repeat step 4 for the second RAM slot.

To reassemble your device, follow these instructions in reverse order.
