INTRODUCTION

This guide will help you replace or upgrade your random access memory. This replacement will be very easy and will only require you to remove some screws.

🔧 TOOLS:

- Phillips #0 Screwdriver (1)

Step 1 — Random Access Memory (RAM)
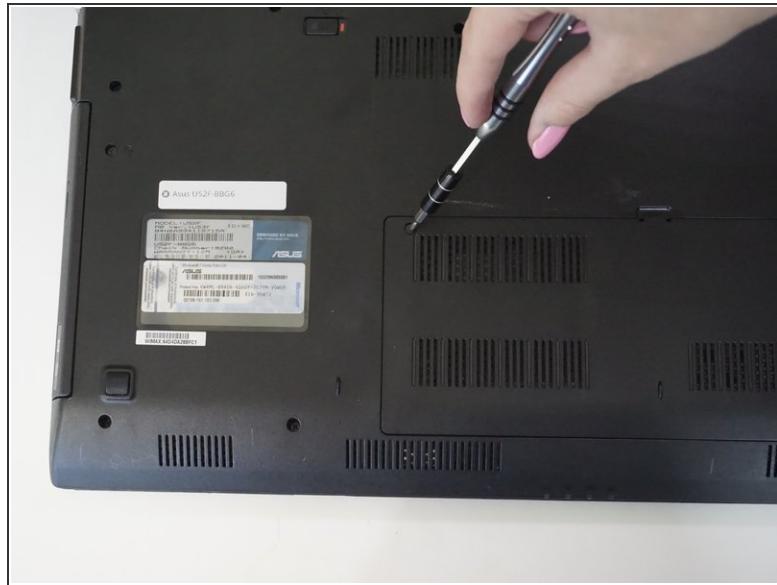

- Unscrew the two 3mm Phillips screws with the PH0 screwdriver.

- Unhook the back panel by inserting your fingernail in the slot provided.

- Lift the panel upward.

Step 2
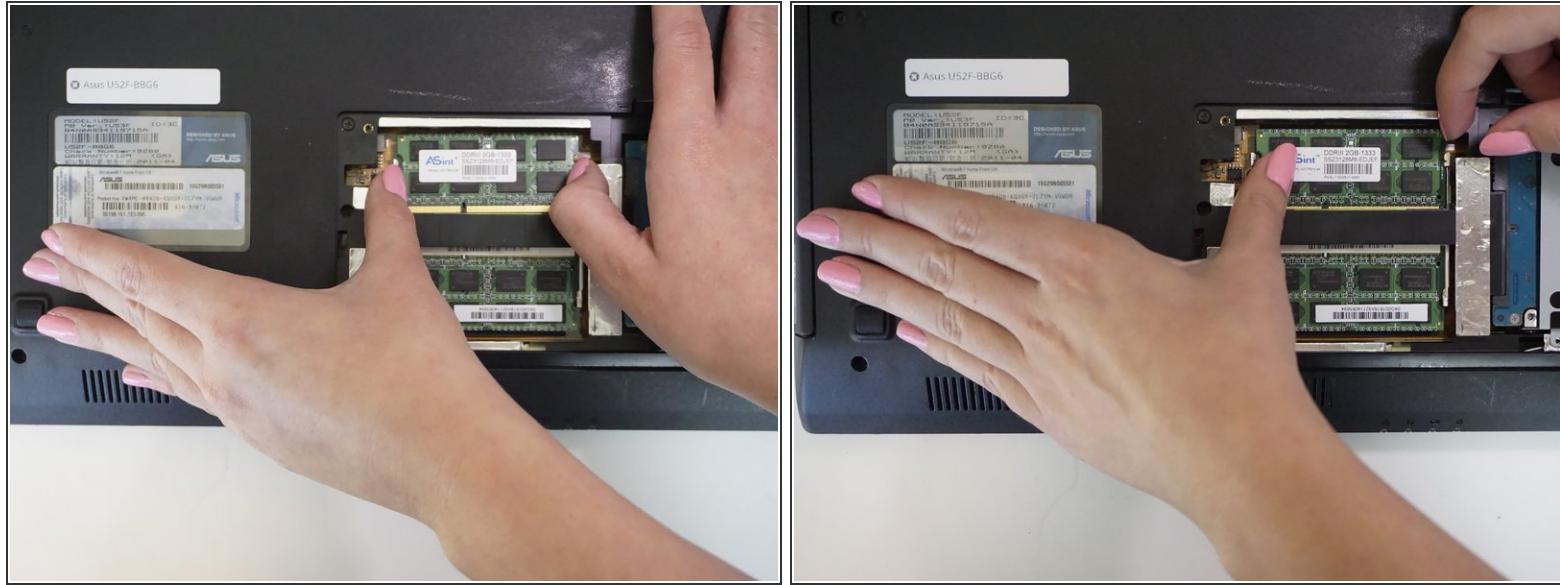

- Use both hands to pull the gold prongs outward.

⚠ Be careful not to get pinched as the RAM will spring upwards when released.

- Lift the RAM out.

To reassemble your device, follow these instructions in reverse order.
