Step 1 — Keyboard

⚠️ Make sure the device is powered off and the battery is removed before beginning.
● Use the Plastic Opening tool to pry the five slots up at the top of the keyboard.

Step 2

● Lift the keyboard enough to expose the two ribbon connectors (LCD flex cable and flex band).

● Use the Plastic Opening tool to push open the two black clips on each side of the connecting cords.

● Remove the cable after pushing out the two black clips.

This document was generated on 2019-10-31 03:25:14 PM (MST).

Step 3

- Push out each end of the black clip with a plastic opening tool or nylon spudger to remove the ribbon cable.

- Remove the cable after pushing out both black clips.

- Remove the keyboard.

Step 4 — Case Removal

- Remove the thirteen 5 mm J0 screws from the back of the laptop.

- With the keyboard removed, use the spudger tool to pry around the edge of the laptop until it is free.

This document was generated on 2019-10-31 03:25:14 PM (MST).

Step 5

- Use the spudger tool to unplug the two cords from the body by pushing on the tabs on both sides of the plug.

Step 6

- With the previous two cords unplugged and out of the way, you can work on unplugging the black cord.

- Use your fingers to pull up on the clear tab, or use the spudger tool to push out both sides of the connector.

|

Step 7

- Carefully lift and remove the plastic cover to avoid damaging anything.

To reassemble your device, follow these instructions in reverse order.
