Step 1 — Back Case Housing

- Remove all ten 6mm Phillips #1 screws from the bottom of the computer chassis.

Step 2

- Carefully pry open the back cover from the laptop and place it to the side.

Step 3 — WIFI CHIP

- Locate the wifi module on the back of your laptop.

- Use an iFixit opening tool to pry the black (Main) and the white (Aux) coaxial cable connectors upward.

Step 4
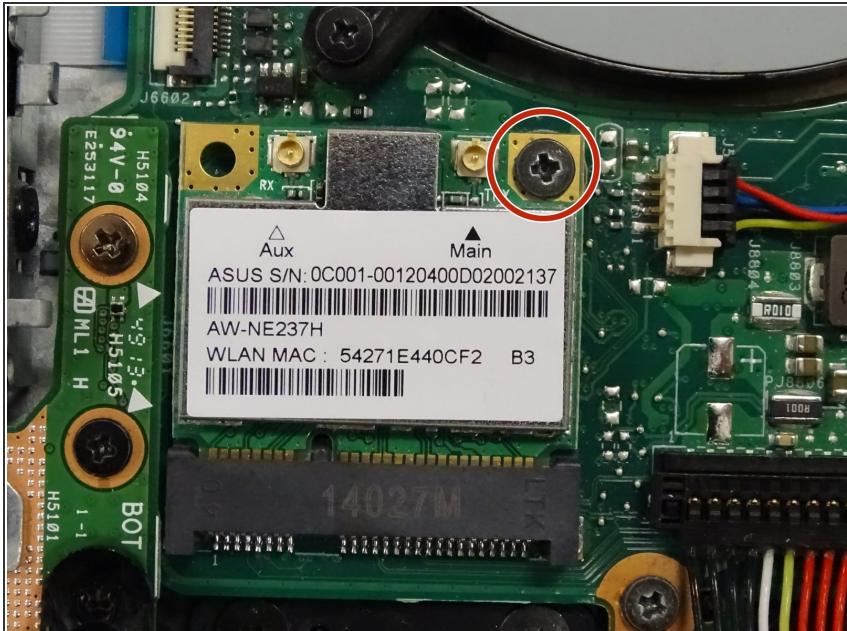

- Remove the 5mm screw from the module using the Phillips PH1 screwdriver.

Step 5
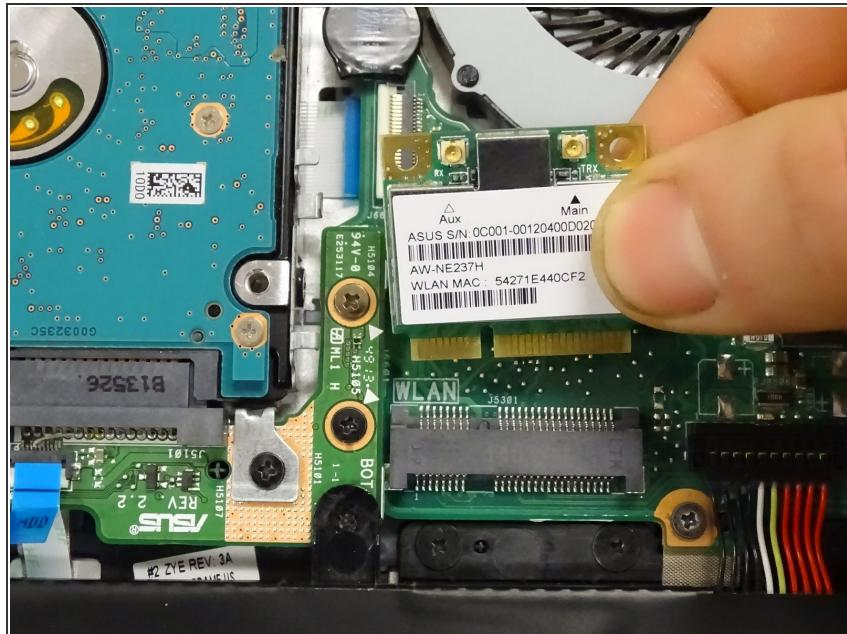

- Gently pull the WiFi module out of its housing from the motherboard.

⚠ Careful not to break or bend the metal contacts.

To reassemble your device, follow these instructions in reverse order.
